Single-user licenses

PASW® Statistics* GradPack

For students in advanced quantitative courses or those conducting graduate-level research. This powerful statistics package gives students the advanced statistics and techniques unavailable in most student software packages.

- **Eligible Participants** – Students
- **Tools Included** – PASW® Statistics Base** plus: PASW® Advanced Statistics**, PASW® Regression** and Amos™ Structural Equation Modeling (Amos available only on Windows®.)
- **Platform** – Microsoft® Windows, Mac® and Linux®
- **Limitations** – No case or variable limits. Package is only for use on students' personal computers.
- **Where to Buy** – Four-year licenses of PASW Statistics GradPack are available at campus bookstores and online at: www.journeyed.com, www.academicssuperstore.com, www.studentdiscounts.com and www.gradware.com. (Instructors: if this is a required or optional package for a specific course, you can request that your bookstore stock the PASW Statistics GradPack.)
- **Additional Information** – This package can be upgraded to a professional version with added modules at a special academic price.

PASW® Statistics GradPack Base*

For undergraduate statistical courses or MBA executive programs. PASW Statistics GradPack Base includes the full version of PASW Statistics Base with no case or variable limits. With PASW Statistics 18, other modules may be added on an a la carte basis through e-academy's OnTheHub SPSS store (www.onthehub.com/spss.)

- **Eligible Participants** – Students
- **Tools Included** – PASW Statistics Base
- **Platform** – Windows, Mac and Linux
- **Limitations** – No case or variable limits, can be upgraded, modules can be added, can be professionalized. Package is for student home use only.
- **Where to Buy** – You may lease a copy for 6 or 12 months at e-academy's OnTheHub SPSS store, located at www.onthehub.com/spss. (Instructors: if this is a required or optional package for a specific course, you can request that your bookstore stock the four-year version of PASW Statistics GradPack Base.)

* PASW Statistics GradPack and PASW Statistics GradPack Base were formerly called the SPSS Statistics Graduate Pack™ and the SPSS Career Starter Program™

** PASW Statistics Base, PASW Advanced Statistics and PASW Regression, formerly called SPSS Statistics Base, SPSS Advanced Statistics and SPSS Regression, are part of SPSS Inc.'s Predictive Analytics Software portfolio.

PASW® Statistics Student Version***

For students beginning to learn statistics. With this version, students can spend their time learning statistics rather than software, thanks to the easy-to-use interface and comprehensive online help system.

- **Eligible Participants** – Students
- **Tools Included** – PASW Statistics Base
- **Platform** – Windows
- **Limitations** – This software allows up to 50 variables and 1,500 cases. PASW Statistics command syntax and scripting and automation capabilities are unavailable. Other modules cannot be used with this package. Package is for student home use only.
- **Where to Buy** – The PASW Statistics Student Version is available at campus bookstores. (Instructors: if this is a required or optional package for a specific course, you can request through Pearson Inc. that your bookstore stock the PASW Statistics Student Version.)

PASW® Modeler* GradPack**

For students developing data mining skills. This package can be incorporated into courses that cover customer relationship management (CRM), Web mining, one-to-one marketing, database marketing, business intelligence and more. This package includes the fully functional version of the software, a reference guide and datasets.

- **Eligible Participants** – Students
- **Tools Included** – PASW Modeler†, PASW Text Analytics†
- **Platform** – Windows
- **Limitations** – No case or variable limits
- **Where to Buy** – Lease a copy for 12 months at e-academy's OnTheHub SPSS store, located at www.onthehub.com/spss. (Instructors: you can request that your bookstore stock this package, or contact SPSS Inc. Sales at 1.800.543.2185 and select menu option 2.)

PASW® Statistics Faculty Pack***

The PASW Statistics Faculty Pack was created to provide an easy and cost-effective means for educators to include statistics and quantitative methodology in their course curricula. PASW Statistics Faculty Pack combines the powerful statistics of the full PASW Statistics suite into an easily accessible product.

- **Eligible Participants** – Post-secondary educators
- **Tools Included** – PASW Statistics Base plus: PASW Advanced Statistics†, PASW® Bootstrapping†, PASW® Categories†, PASW® Complex Samples†, PASW® Conjoint†, PASW® Custom Tables†, PASW® Data Preparation†, PASW® Decision Trees†, PASW® Direct Marketing†, PASW® Exact Tests† (Windows only), PASW® Forecasting†, PASW® Missing Values†, PASW® Neural Networks†, PASW Regression† and PASW® Statistics Developer†
- **Platform** – Windows, Mac and Linux
- **Limitations** – No case or variable limits. Package is for academic teaching use only.
- **Where to Buy** – Lease a copy for 12 months at e-academy's OnTheHub SPSS store, located at www.onthehub.com/spss.

*** PASW Statistics Student Version, PASW Statistics Faculty Pack and PASW Modeler GradPack were formerly called the SPSS Student Version™, the SPSS Faculty Pack and the Clementine® Graduate Pack™.

† PASW Categories, PASW Complex Samples, PASW Conjoint, PASW Custom Tables, PASW Data Preparation, PASW Decision Trees, PASW Exact Tests, PASW Forecasting, PASW Missing Values, PASW Modeler, PASW Neural Networks and PASW Text Analytics, were formerly called SPSS Categories™, SPSS Complex Samples™, SPSS Conjoint™, SPSS Custom Tables, SPSS Data Preparation™, SPSS Decision Trees, SPSS Exact Tests™, SPSS Forecasting, SPSS Missing Values™, Clementine, SPSS Neural Networks™ and Text Analysis for Clementine. PASW Bootstrapping, PASW Direct Marketing, and PASW Statistics Developer were introduced with PASW Statistics 18. All are part of SPSS Inc.'s Predictive Analytics Software portfolio.

Textbook bundles

PASW Statistics Integrated Student Version (ISV)

Content is the same as Student Version, but this product is bundled with textbooks.

- **Eligible Participants** – Students
- **Tools Included** – PASW Statistics Base
- **Platform** – Windows
- **Limitations** – This software allows up to 50 variables and 1,500 cases. PASW Statistics command syntax and scripting and automation capabilities are unavailable. Add-on modules cannot be used with this package. Package is for student home use only.
- **Where to buy** – How to buy/bundle software in your textbook: if you are an instructor interested in using a book already bundled with the ISV, or an author interested in bundling your book with the software, e-mail books@spss.com or call SPSS Inc. Sales at 1.800.543.2185, and select menu option 2.

Multi-user Licenses

You may also consider purchasing a multi-user license for your institution rather than having faculty and students purchase individual copies. Choose from the following options, which are for on-campus installation or educator home use.

PASW Statistics Site License

Install PASW Statistics software on individual machines and on educators' home machines with a site license. Licenses are determined by the number of copies in circulation (a "copy" is defined as belonging to a specific, named faculty member, staff member or lab station).

- **Tools Included** – Any combination of PASW Statistics Base plus: PASW Advanced Statistics, PASW Bootstrapping, PASW Categories, PASW Complex Samples, PASW Conjoint, PASW Custom Table, PASW Data Preparation, PASW Decision Trees, PASW Direct Marketing, PASW Exact Tests (Windows only), PASW Forecasting, PASW Missing Values, PASW Neural Networks, PASW Regression and PASW Statistics Developer

- **Platform** – Windows, Mac and Linux
- **Where to Buy** – Annual and perpetual licenses are available. Call 1.800.543.2185, select menu option 2 and ask to be connected to the SPSS Inc. representative for your school.

PASW Statistics Network License

Install SPSS Inc. license management software on a server, providing access exclusively to users with network access, with an PASW Statistics network license. Licenses are determined by the number of simultaneous users (non-specific people) who access PASW Statistics at any given time. A PASW Statistics network license is a cost-effective way to extend access to many users. It also enables you to designate a certain percentage of licenses as commuter licenses, which licensed users can check out. This enables network license users to run PASW Statistics without connecting to the network and the license manager. For example, faculty and staff can use PASW Statistics software on a university-owned or controlled computer from home or while attending conferences.

- **Tools Included** – Any combination of PASW Statistics Base plus: PASW Advanced Statistics, PASW Bootstrapping, PASW Categories, PASW Complex Samples, PASW Conjoint, PASW Custom Table, PASW Data Preparation, PASW Decision Trees, PASW Direct Marketing, PASW Exact Tests (Windows only), PASW Forecasting, PASW Missing Values, PASW Neural Networks, PASW Regression and PASW Statistics Developer
- **Platform** – Windows, Mac and Linux
- **Where to Buy** – Annual and perpetual licenses are available. Call 1.800.543.2185, select menu option 2 and ask to be connected to the SPSS Inc. representative for your school.

These licenses are available for educational institutions located in the U.S. and Canada only. If your institution is located in another country, please contact your local office for details about licenses available to you.

Successful academic writing begins with SPSS Inc.

Are you working on an SPSS Inc. software-related text? The SPSS Inc. Academic Authors Program can provide you with assistance every step of the way. From free software, complimentary upgrades and technical support, to inclusion on the SPSS Inc. Web site, we work with you to ensure your publishing project's success.

Comprehensive support

The Academic Authors Program ensures that you receive comprehensive support from us throughout the writing process. The program provides you with:

- A six-month license for the appropriate software, for use while writing a new textbook (or SPSS Inc.-related text) or revising an existing one. If you require more time to complete your book, you can request an additional 6-month license.
- Technical support for the term of the license
- An opportunity to upgrade your software or renew your license if you have completed the book and your 6-month license has expired
- An invitation to participate in our beta testing programs

Though we are currently unable to proactively market your book, we provide promotional support as part of the overall program. This includes placing the description of your book on our Web site with a link to the publisher's site, making it easy for instructors to request additional information.

Academic Author requirements

While the Academic Authors Program is rooted in scholastic writing, academic affiliation is not necessary, and the text does not have to be strictly for use in the academic world. All authors planning or working on SPSS Inc. software-related texts are eligible to participate.

To participate in the program, we ask you to complete an enrollment form. If you are currently working on a textbook or plan to begin work on a textbook within the next 45 days you are eligible for a 6-month license of SPSS Inc. software. Authors with completed works not yet listed on the SPSS Inc. Web site should also complete the form.

A written contract signed by the author and SPSS Inc. is required. You must also provide us with two copies of the completed book for inclusion in the SPSS Inc. library.

Let us help you succeed

We appreciate the opportunity to foster projects that increase awareness of SPSS Inc., and enthusiastically work to ensure authors receive all of the support they need to complete their projects.

To participate in the Academic Authors Program, or for more information, send an e-mail to books@spss.com.
